The American Library Association-accredited Library and Information Science program provides a variety of learning experiences that prepare students for careers as archivists, librarians, and information professionals for the rapidly changing digital environment.

In a 100% face-to-face and small-class-size learning environment, our program combines a solid foundation in the field of library and information science as well as electives that are geared toward a student's area of concentration.

Working together with a faculty advisor, students will design a course work plan that fits a specific specialization area such as Archives and Special Collections, Early Childhood Librarianship, Information Technology, and Reference Services.

Available Degrees

**MLIS**

The Master of Library and Information Science program is based on practices and underlying theories of information seeking behavior, information acquisition, organization, transmission, utilization, and curation.

**Requirements**

58 quarter credit hours and successful completion of a portfolio and a culminating experience consisting of a 100 hour practicum or a capstone project.
